Management Education

Student Feedback

The program has a strong international focus and exposed me to some of the most dynamic academics and professionals, whose experience was really inspiring. It has sharpened my management and leadership skills. The program has surpassed my expectations and augured well with my professional goals. Neil J.

I would like to place on record my appreciation. I found the modules useful and instructive. I am confident that my MBA will give me an edge in the job market. Brian S.

I chose the programme to get closer to my dreams. It gave me the opportunity to interact with people from different industries, specializations, and nationalities, combined with international exposure, enhancing my breadth and depth of knowledge. I am glad I made the right choice. Praveen.

The MBA has provided the platform for growth in my career. It will be a challenge in more ways than you can imagine and I would recommend this programme to anyone who believes in improving themselves professionally and personally. Saravanan T.

Welcome to EurAka Welcome to Swiss Higher Education

The E.H.E. Europa Hochschule EurAka CH or by her international name, the private E.H.E. European University EurAka Switzerland, is a research-intensive and future-oriented University with her headquarter in Switzerland's Canton Basel-Landschaft (Basel County). Our University operates campuses in Switzerland and Germany to which adds a number of specialist knowledge and research centres in Germany.

That Switzerland's universities and higher education both belong to the world's best is for our University a specific challenge to which we actively contribute not only by first-tier education, but equally internationally acknowledged research with research output of global impact. Thus, we offer innovative and contemporary academic programmes of outstanding excellence.

We equip our students with skills and knowledge supporting their successful careers. We are very proud of our internationally acknowledged high academic quality standards, where intercultural understanding and mutual respect is at the core of the delivery of our studies. Studying with the E.H.E. EurAka is challenging, but rewarding. Global awareness, emphasis on social responsibility, and sustainability to which we encourage our students and which is equally demonstrated by all faculty members are permanent companions.

I look forward to welcoming you at the E.H.E.
EurAka in Switzerland.

Prof Dr h.c. Paul Diener
President

The Europa Hochschule EurAka CH **(E.H.E. Private European University EurAka Switzerland)**

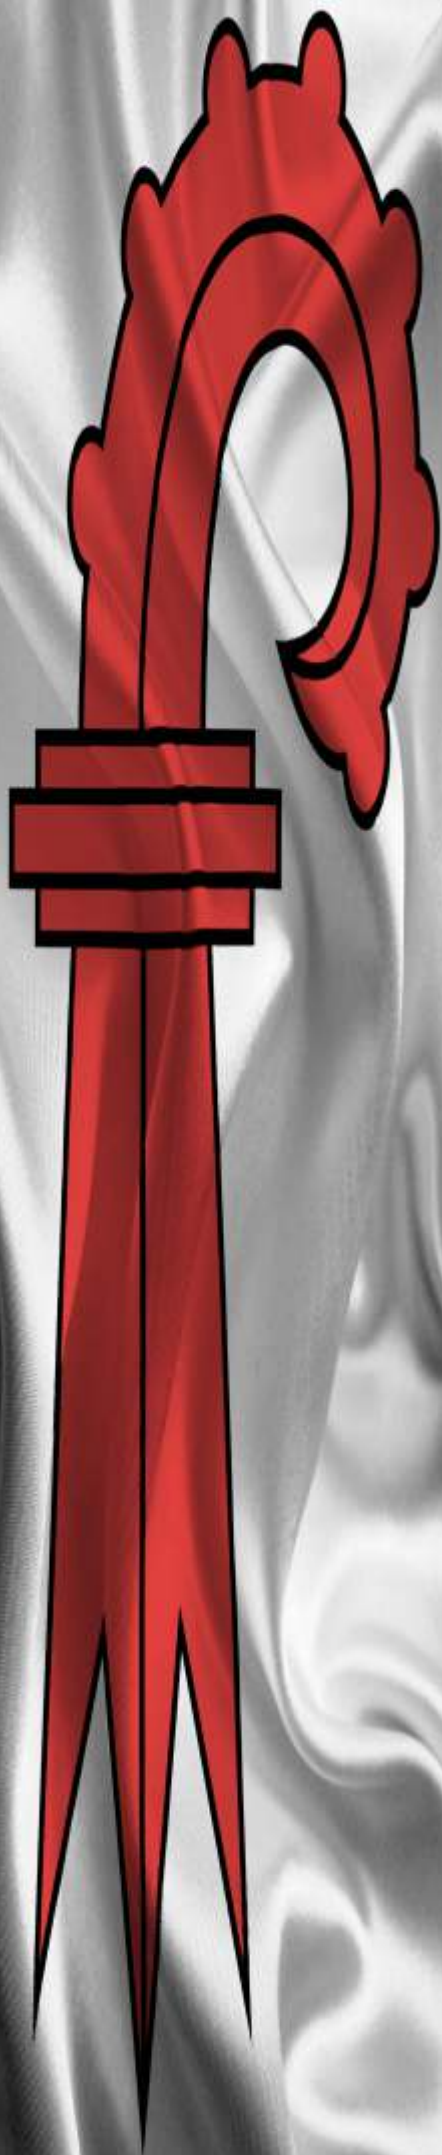

The E.H.E. Europa Hochschule EurAka CH, internationally known as the private European University EurAka Switzerland, is an independent and private University for integral medicine, technology, and economics. The E.H.E. EurAka is situated in Therwil (Switzerland) and legalised by the Swiss Federal Republic and the Canton Basel-Landschaft as private University. The status of the private EurAka University is officially confirmed as 'non-contributory private institution' according to the Swiss Higher Education Act (HFKG). The E.H.E. EurAka is officially approved to award Swiss Bachelor, Master's, and doctoral degrees.

The E.H.E. EurAka was constituted in 1985. The University provides national and international research and programmes of studies in the fields of Integral Medicine, Technological Sciences, and Business Sciences. The E.H.E. EurAka research, especially in technology and engineering, owns the highest international reputation and attracts significant research funding from global

corporations and European Governments.

Upon recommendation by the State-Council of the Swiss Republic and the Canton Ticino, the E.H.E. EurAka has received official Degree Awarding Powers in the year 2000. The status of Degree and Research Degree Awarding Powers was reapproved by the country's various regulatory authorities in 2006, such as the Dipartimento della cultura e dell' educazione dello Sport, Ticino, and by the Canton Basel-Landschaft in 2016. They concluded that the E.H.E. Europa Hochschule EurAka CH is fully aligned with the laws of Switzerland and thus officially approved as Swiss "Hochschule on the level of University".

Switzerland itself is aligned with the so-called Bologna Process of the European Union making Degrees of the University cognate across Europe and beyond. Hence, the University awards Degrees with ECTS credits.
...

... It is essential to highlight that the private European University EurAka is a fully-fledged University, with a variety of Institutes to which belong, e.g., two accredited holistic Healthcare Centres for medical education, and the second Campus in Königstein nearby Frankfurt (Germany). To these Institutes add various centres in Germany having specialised in particular fields of research.

The E.H.E. EurAka has appointed national centres, which, as our Accredited Partner Institutes, are entrusted with the delivery of the E.H.E. EurAka's academic programmes in Europe, Asia, and Africa.

These international programmes of studies are taught in English language. In addition, the E.H.E. EurAka has entered a variety of academic partnerships with prestigious Universities around the globe. These many collaborations comprise Partner Universities from Western and Eastern Europe, Africa, and the Far-East. These academic partnerships are complemented by further ones with the industry.

The innovative programmes of the E.H.E. EurAka fulfil both academic needs and industry-orientation for the improvement of graduates' attractiveness on global job markets meeting the official demand for Employability Impact this way.

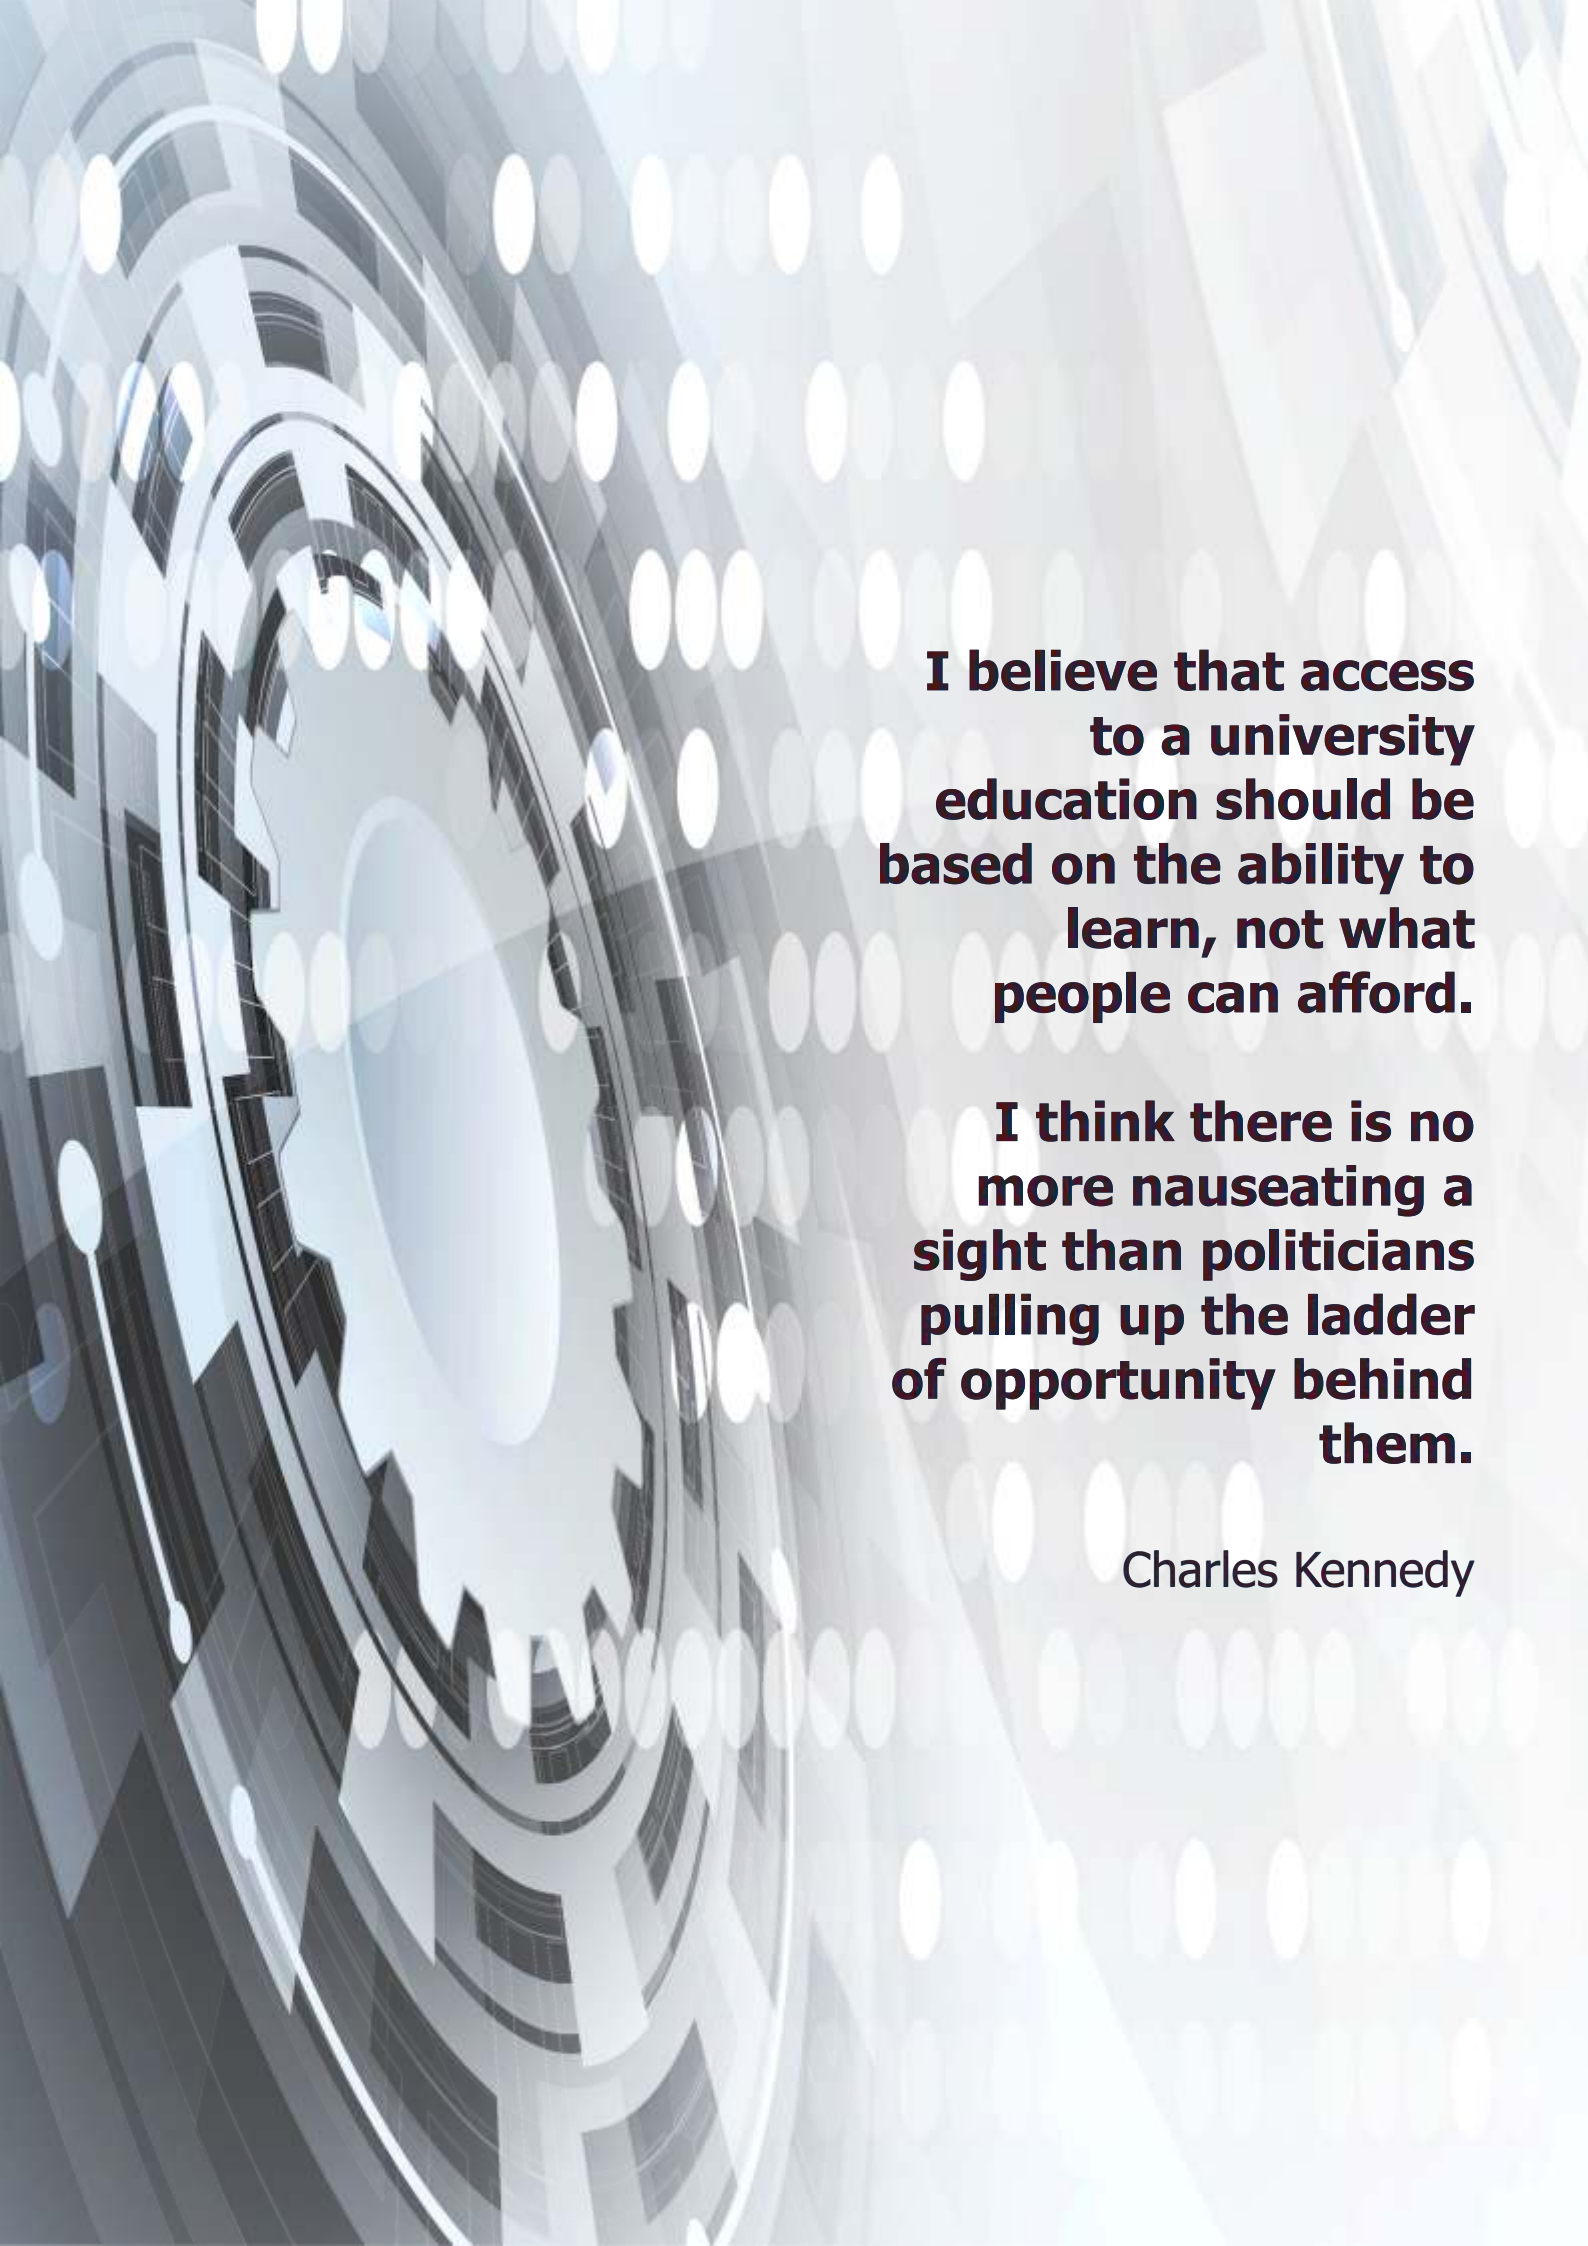

'First, have a definite, clear practical ideal; a goal, an objective.
Second, have the necessary means to achieve your ends; wisdom, money, materials, and methods.
Third, adjust all your means to that end.'

Aristotle

The E.H.E. EurAka:

- Officially approved private Swiss University
- Accredited and certified by the Accreditation-Certification-Conference (ACC) for Holistic Quality Management System
- Campuses and specialist knowledge centres in Switzerland and Germany
- Official Degree and Research Degree Awarding Powers
- University Institutes comprising
 - Economy
 - Technological Sciences | Engineering
 - Integral Medicine
- Degrees are part of the Process of Harmonisation of Higher Education in Europe according to DIN EN ISO / IEC 17024 and are awarding ECTS Credits
- Bachelor - Master's - Doctoral Studies (PhD and DBA)
- Advanced Member and Signatory of the United Nation's PRME Framework
- Institutional Member of the European Council of Business Education (ECBE)
- Additional offer of the personal ISO 17024 Certification embedded into programmes of studies
- Multinational faculty of internationally acknowledged professors
- First tier research activities having attracted substantial research funds from governments and industry
- Close academic collaboration (teaching and research) with renowned public and private Universities from various countries all around the world
- Permanent consultancy for global corporations

**I believe that access
to a university
education should be
based on the ability to
learn, not what
people can afford.**

**I think there is no
more nauseating a
sight than politicians
pulling up the ladder
of opportunity behind
them.**

Charles Kennedy

The Vision of the E.H.E. Europa Hochschule EurAka CH

The Europa Hochschule EurAka CH (private E.H.E. European University EurAka Switzerland) is an officially approved Institution of Higher Education globally supporting the delivery of knowledge and the transfer of knowledge through inclusion and equality. Morally and ethically, social responsibility and sustainability are core values and supporting drivers governing the University now and in its future development.

Our vision is delivering higher education of best European quality and highest standards. Higher education without borders being delivered through modern and innovative academic methods. Higher education bringing together students from all around the world. Students being driven by intellectual curiosity and the desire to improve themselves and positively influence their environment through our academic studies as part of their Continuous Professional Development in their cycle of Lifelong Learning. Studies, which are globally accessible and affordable and future-oriented at the same time. Studies adopting holistic and cross-disciplinary approaches in a permanently changing and challenging world.

The E.H.E. EurAka and her international faculty consider higher education as being only committed to knowledge. The E.H.E. EurAka higher education has no other purpose than educating students, who want to contribute to developments through sustainable management, delivered in ethical and socially responsible ways. It is higher education for those acknowledging that organisations are made of human beings and serve economy and society equally.

The E.H.E. EurAka higher education makes a difference through graduates, who are enabled and inspired to globally use the knowledge gained through their studies for contributions to make change happen for the better.

The Mission of the E.H.E. Europa Hochschule EurAka CH

The E.H.E. Private European University EurAka Switzerland educates undergraduate students preparing them for successful careers in their respective profession. Postgraduate students are developed to become examples of leadership within a complex global economy and society as professionals and executives seeking renewed vision and new skills for their profession. Doctoral students aiming for leadership roles at highest level through superior knowledge and capabilities to shape organisational and societal futures are guided towards excellence in practice and academia equally.

Effective teaching and learning, and research advancing business, management, technology, and other disciplines' theory, while enhancing best practice for organisational and societal benefits are decisive means to these the E.H.E. EurAka's ends. Our efforts for this achievement embrace a partnership of students, faculty, staff, and the wider academic community.

Therefore, our pedagogical approach focuses on students' learning needs. Teaching is consistently put in relation to best practice

and needs in the societal, public, and economic interest.

We seek and value the support and advise of our alumni and the wider stakeholder community. We aspire to be an effective, responsive and responsible organisation for our community. Our mission is to shape professionals and academics by developing critical thinking for leadership, management, and strong professional skills including those related to cultural, economic, and human issues to better understand the globalised environment the E.H.E. EurAka's graduates are working in.

We carefully select our Accredited Partner Institutes for that they share these our values with us and that students can be assured that they are receiving the same value of education around the globe as when studying at one of the E.H.E. EurAka's own campuses.

This way the core of our mission is delivering superior quality in global higher education, which is responsible and delivers sustainable values leading to knowledge and skills employers value and graduates are proud of.

Academic Quality in Education and Science

In her past, the E.H.E. EurAka has held many accreditations and certifications. Among these were, e.g., EduQua, SQS, IQNet or Quality Austria, to name just a few. However, the University decided not to renew these, because her own quality assurance and management went far beyond these standards. To this adds that most neither are following standards, like ISO, EN/DIN, which are officially and internationally approved.

This solid position, the E.H.E. EurAka could adopt, because through her directly associated DBIC International, Business Unit Quality Management, she herself can accredit/certify. But that was not enough. The objective was an objective standard of accreditation and certification, which is not like so many others, popular but are in no way attributed a true official status.

Therefore, through the DBIC International, a partnership was constituted with two official

Certification Bodies, which both are international heavyweights: Switzerland's QS Zurich AG and Germany's DeuZert GmbH. DeuZert is a founding member of the globally recognised ISO 29990 in Education, which is actually replaced. The result of this collaborative partnership, which further partners joined, is the **Accreditation-Certification-Conference for Holistic Quality Management in Education and Science, ACC**.

This Conference exclusively works according to officially approved and internationally recognised quality norms. And, exactly that makes the all decisive difference to other accreditations, how popular they may ever be.

In addition, the E.H.E. EurAka has become an **Advanced Member and Signatory of the United Nations' PRiME Framework** and is an **Institutional Member of the European Council of Business Education, ECBE**.

Thus, the respective status of the E.H.E. EurAka is not only of superior standard. Decisively different, it meets officially recognised international norms.

Certification Accreditation

The ACC Accreditation and Certification Certificate testifies and certifies that the University Approval of the E.H.E. Europa Hochschule EurAka CH, Switzerland, research and teaching, is based on the principles of the latest Swiss University Law and according to the guidelines "Bologna of the European Higher Education Area". In addition, as private University, the Swiss Commercial Authority, HR-SID, officially authorises the University of the E.H.E. EurAka to operate in own autonomy with regards to the cantonal and federal regulations of both the Swiss Constitution and Civil Code.

Furthermore the ACC accredits and certifies that the E.H.E. EurAka is compliant with the internationally recognised official norms of the EN DIN ISO IEC 9001, EN DIN ISO IEC 21001: 2018, and according to the internationally recognized "International Accreditation Forum" IAF, standard EN DIN ISO IEC 17024.

Constituting Members of the Accreditation-Certification-Conference (ACC) in Holistic Quality Management for Science and Education:

- **QS Zurich AG, Switzerland: Certification Institution accredited by the Swiss Accreditation Service SAS**
- **DeuZert GmbH, Germany: Certification in Education and Business**
 - **Accreditation Body DAKKS**
 - **Founding Member IFCES**
 - **for the international organization service to ISO 29990:2010 in education**
- **DBIC International GmbH, Business Unit Quality Management, Germany:**
 - **B. TÜD TÜV Cooperation**
 - **U. B. ICP International Consulting Partner**
- **iPAT Institute, Germany of the University Nuremberg-Erlangen**
- **University of Sopron, Faculty of Economics,**

Added Value through Integrated ISO 17024 Certification

Personnel certification has become an important element of verifying the competence of an increasingly mobile and global workforce emphasising the value of industry-acknowledged credentials being recognised and recognisable across national borders.

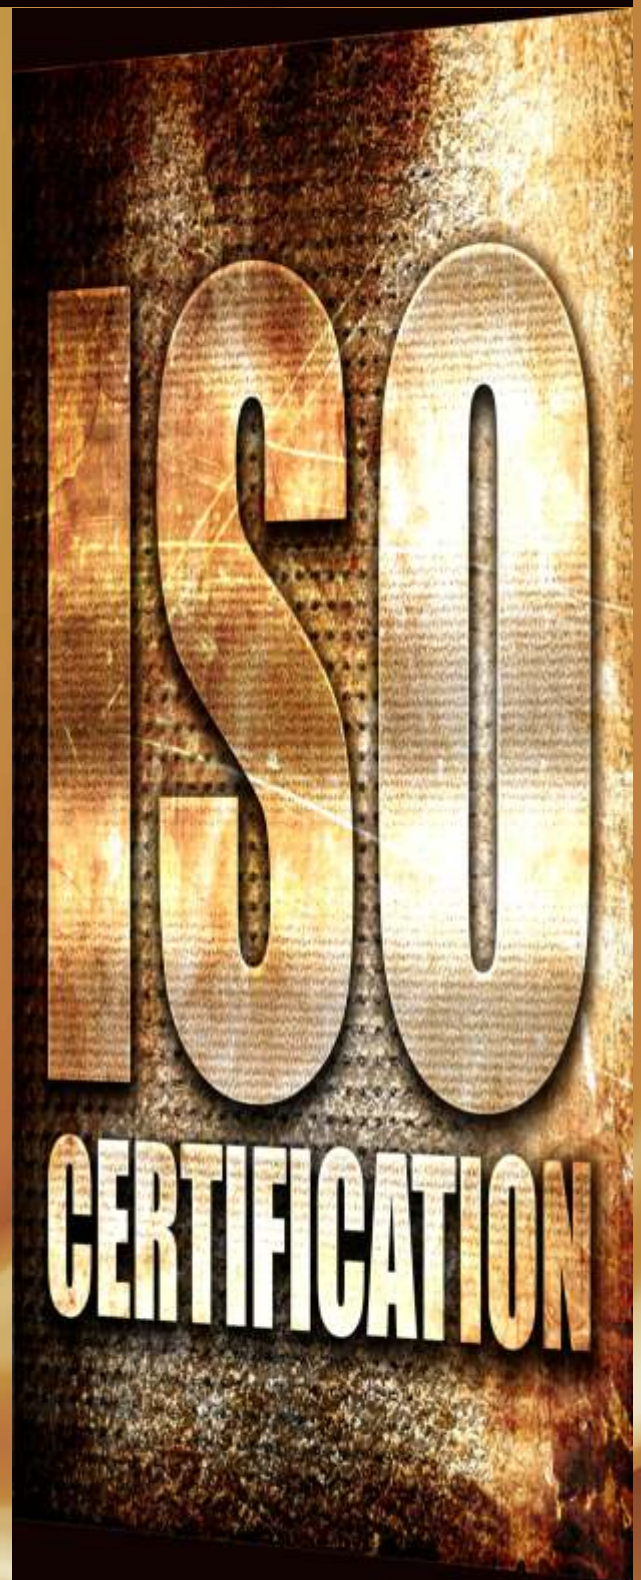

In response to this growing need, a new and improved ISO/IEC International Standard standardises and harmonises the various processes being used around the world for certifying the competence of staff in different professions.

ISO/IEC 17024:2012 Conformity assessment

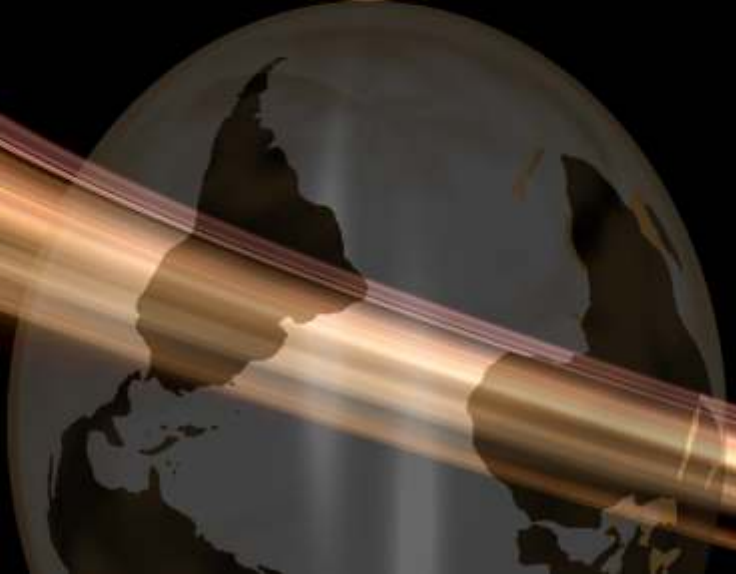

are general requirements for assessing bodies officially delivering the certification of persons. This represents a global benchmark for staff certification programmes ensuring that they operate in a consistent, comparable, and reliable way worldwide, thereby allowing individuals to have skills being recognised across national borders.

As a result of her rather unique position, explained on the pages before, as one of very few universities, the private E.H.E. Europa Hochschule EurAka CH, offers students the option to enrol for their own globally valid ISO 17024 Certification: Little extra effort, which does not extend the standard period of studies, gains graduates significant extra value demonstrating employers professional skills and capabilities in addition to their academic knowledge.

Differentiating maximisation of outcomes for Employability Impact

**The
E.H.E. EurAka -
Global & Transnational
Studies Shaping
Students' Future**

Regional E.H.E. EurAka Centres around the Globe

Delivering studies in often very distant countries means trust first of all. Students have to trust that they are getting the same high quality as if studying with the E.H.E. EurAka herself. The University must have the confidence that national centres of studies are exactly delivering this same quality.

This is not just a question of equality regarding graduates' skills and knowledge, it also is prerequisite regarding applicable regulations, in the E.H.E. EurAka's country of origin and additionally, in the host country of delivery.

To assure such equal quality, the E.H.E. EurAka collaborates with carefully selected partner institutes in Africa, Asia, and Europe.

he same quality of studies is of utmost importance, because all students are awarded with the same Swiss degree. The E.H.E. EurAka takes her responsibility very seriously. Therefore, students' welfare and progress are permanently monitored. Furthermore, all our regional partner centres being entrusted with the delivery of our programmes of studies are receiving direct support for that students can study with confidence in the quality of their studies.

The E.H.E. EurAka has established internationally acknowledged academic standards according to DIN EN ISO / IEC 17024.

Prof Dr Dr habil Klaus Oestreicher
Vice President International

E.H.E. EurAka Study Centre Frankfurt, Germany

In alliance with the Federal
Association of SME, Germany

Partnerships with the Industry

The E.H.E. EurAka has not only entered a number of global academic partnerships but equally increases those with partners from industry and trade. The private University is well aware that too often organisations complain that studies are too distant from what they expect and need.

To bridge this gap, there are roundtable discussions or conferences like the one in Lusaka in Zambia in 2019, where the E.H.E. EurAka can meet and discuss with representatives of industry, trade, and organisations, what these their needs are.

This is not only helping the public and private sector. It equally assists the University to discover trends and adjust her programmes for that graduates are well prepared and have easier access to national and international employment.

One of the most far-reaching and outstanding partnerships is with the prestigious German Association of the BVMW, the Association of Midsized Companies. Not only that the BVMW represents all types of businesses and sectors for a whole variety of inputs. A Board Member of the BVMW has become a Member of the E.H.E. EurAka as well. This advantageous combination leads to direct influence in the development of a new strand of studies focused on Industry 4.0.

Innovative, future-oriented, and once more focused on Employability Impact, the E.H.E. EurAka connects and bridges gaps. For the E.H.E. Euraka the concept of academia meets industry is all about being the interface for industrial demand and graduates' skills offer.

The E.H.E. EurAka Bachelor Studies

Bachelor studies of the E.H.E. Private European University EurAka Switzerland usually provide a standard period of studies of three years. According to European standards on this level of studies, students gain a total of 180 ECTS credits (European Credit Transfer and Accumulation System).

According to a number of non-European higher education systems, specific programmes are extended to four years of studies offering 240 ECTS credits then. Such extended periods of studies are not only to meet foreign regulations, but equally to provide students with integrated practice orientation through, e.g., internships.

Employability Impact means to equip graduates with more than knowledge. First experience on the job is most valuable.

The E.H.E. EurAka offers various pathways of specialisation in its expertise of business, medical, and technological studies. Especially its Bachelor in Hospitality or Hotel Management are programmes of excellence.

Prior professional experience allows to meet entry requirements through the so-called work-based entry route or, if such experience is solid beyond average, the process of Acknowledgement of Prior Learning may even shorten the chosen programme.

The global approach of the E.H.E. EurAka also provides recognition of non-European School Certificates or equivalent, if awarded by an institute of official recognition in its country of origin. The E.H.E EurAka sets her entry requirements high, but does not exclude applicants for reasons of origin.

MASTER CLASS

Master's level certainly is the key point of interest for most candidates. It is the natural progression route in the academic hierarchy, but for professionals from all around the world it often is the opportunity to catch up with what they may have missed earlier.

Today, many organisations simply expect that on senior management level this knowledge, which Master's studies deliver do exist. Therefore, the Europa Hochschule EurAka CH offers a vast range of various pathways of specialisation. Of course, many lead to the Degree Award of the MBA, which owns highest international popularity.

To respect candidates' different starting points when applying, the E.H.E. EurAka invites candidates having a first undergraduate degree, but equally those having significant professional qualifications instead. However, studies are not different: both these groups have to meet the same criteria. They study the same modules and the requirements in these modules are precisely the same.

Despite that students' starting conditions are different professionals usually perform equally. They may lack the experience of working academically at the beginning, but their professional experience and knowledge how organisations work helps to understand study contents by a different approach.

As on Bachelor level, the same criteria apply. The E.H.E. EurAka accepts previous academic and professional qualifications, whether they are from Europe or a non-European country. Their only prerequisite is that all certificates must be issued by an officially recognised institute or professional body in their country of origin. Applicants, who only have their professional expertise can enter through written recommendation by existing and former employers, which is assessed and evaluated by the Registry in a short and individual process.

Entry routes to Master's Degrees are various, the rest is students' effort.

RESEARCH

The E.H.E. EurAka Flagship: The Doctoral School

As open and multiple entry routes to Bachelor and Master's studies are, those for doctoral studies are rigid. From Bachelor to Master's is a rather linear increase in requirements. Thinking that this line continues towards the doctoral degree does not hold. Here the level increases exponentially, because it is a research degree. Clearly, a doctoral degree is not for everyone. Nevertheless, for especially skilled applicants, not fulfilling standard entry requirements, there are options, too.

Instead of the 'traditional' progression route of Bachelor, then Master's, and finally to doctoral studies, highly skilled applicants can profit from a Master's degree integrated into their doctoral studies. This Master's degree cannot only bridge a possibly missing

Master's entry prerequisite, it also delivers research skills being the centre of doctoral research and theses. The Private European University EurAka Switzerland offers four essential doctoral programmes:

PhD (Doctor of Philosophy) - Economics | Medicine | Engineering
DBA (Doctor of Business Administration)
DPA (Doctor of Public Administration)
DHA (Doctor of Healthcare Administration)
MD (Medical Doctor)

The PhD typically is the theory-based degree, while all other doctoral pathways of specialisation are about applied sciences. Which is the right one, is an individual decision. Candidates being in doubt find much advice by faculty members of the E.H.E. EurAka's Doctoral School.

Those, who want to continue after their doctoral degree further and climb up to the ultimate level of studies can enrol in the scientific post-doctoral programme of the

PhD habil. also known as Doctor of Science

EurAka offers the full range of academic studies and all is Swiss made quality.

e-learning

Not everybody wanting to improve their career opportunities can study at one fixed place, whether at home or abroad. Some may simply not be able to attend lectures at regular fixed times, others have to be at different places frequently. But there also is a rather large group wanting to fix speed and effort for their studies individually. These individual circumstances have made e- or distance learning very popular.

The Europa Hochschule EurAka CH addresses this group equally and offers it a still small, but permanently increasing choice of pathways of specialisation. The Distance Learning Institute of the E.H.E. EurAka is the University's latest development. All programmes of studies are delivered by blended learning. The technological environment is solidly tested and already used by many students.

For that these students are not studying totally on their own, the E.H.E. EurAka invites them to participate in blended learning lessons: Workshops and seminars - online or physical - and further means do not only mean getting in touch with like-minded students, they also are essential facilitators allowing to progress much faster towards the intended degree. The E.H.E. EurAka offers interested candidates a number of experts offering advice and individually tailored solutions.

- individually tailored for students, corporations,
and public services**

Business, Management, and Economics

The global studies, which the E.H.E. EurAka offers are mainly focused on business, management, and economics. This has reasons of feasibility, because no laboratories are needed.

Within this range of studies a wide variety of studies on undergraduate and post-graduate level exists. From Bachelor to BBA or Master's Degree to MBA, a wide variety is offered: Finance and Banking, Project Management, General Management, Automotive Management, Agricultural Management, Research, and so on. The list of pathways of specialisation is very wide. When it comes to Switzerland, one pathway cannot be forgotten: Hotel and Tourism Management

For the E.H.E. EurAka's Accredited Partner Institutes three options do exist:

- Adoption of an existing programme of studies (options of customisation exist)
- Requesting the development of a specific pathway of specialisation of interest
- Submission of an own programme of studies for validation (the E.H.E. EurAka confirms awarding its degree)

Language of these studies usually is English, but other languages may be approved as well by using an external academic moderator.

Fact is that each programme of studies meets highest standards of quality and is conform with European higher education requirements.

The Institute for Economy and Law

In 2018, the E.H.E. EurAka Institute for Economy and Law was constituted. It belongs to the Faculty of Economics and offers two strands of degrees:

- Master of Science degrees in form of paralegal studies offering cross-disciplinary studies. These programmes are especially designed for employment in internationally acting organisations. The courses' content offers skills and knowledge in management combined with deep insights into the law.
- LL.M and LL.B programmes, which will follow in 2019 are focused on the law but may have some components with regards to economy.

The E.H.E. EurAka considers this addition as

meaningful to extend the value-oriented expertise of her graduates.

The first two programmes, which the E.H.E. EurAka's Institute for Economy and Law offers are the private University's answer to the demand, which the industry has frequently expressed:

- **The Master of Science in Compliance Management**
- **The Master of Science in International Trade and Law**

The expertise which the E.H.E. EurAka has added herself comprises both law academics and certified experts in these subject areas to assure that first class higher education is guaranteed in this Institute as well.

Technology + Management

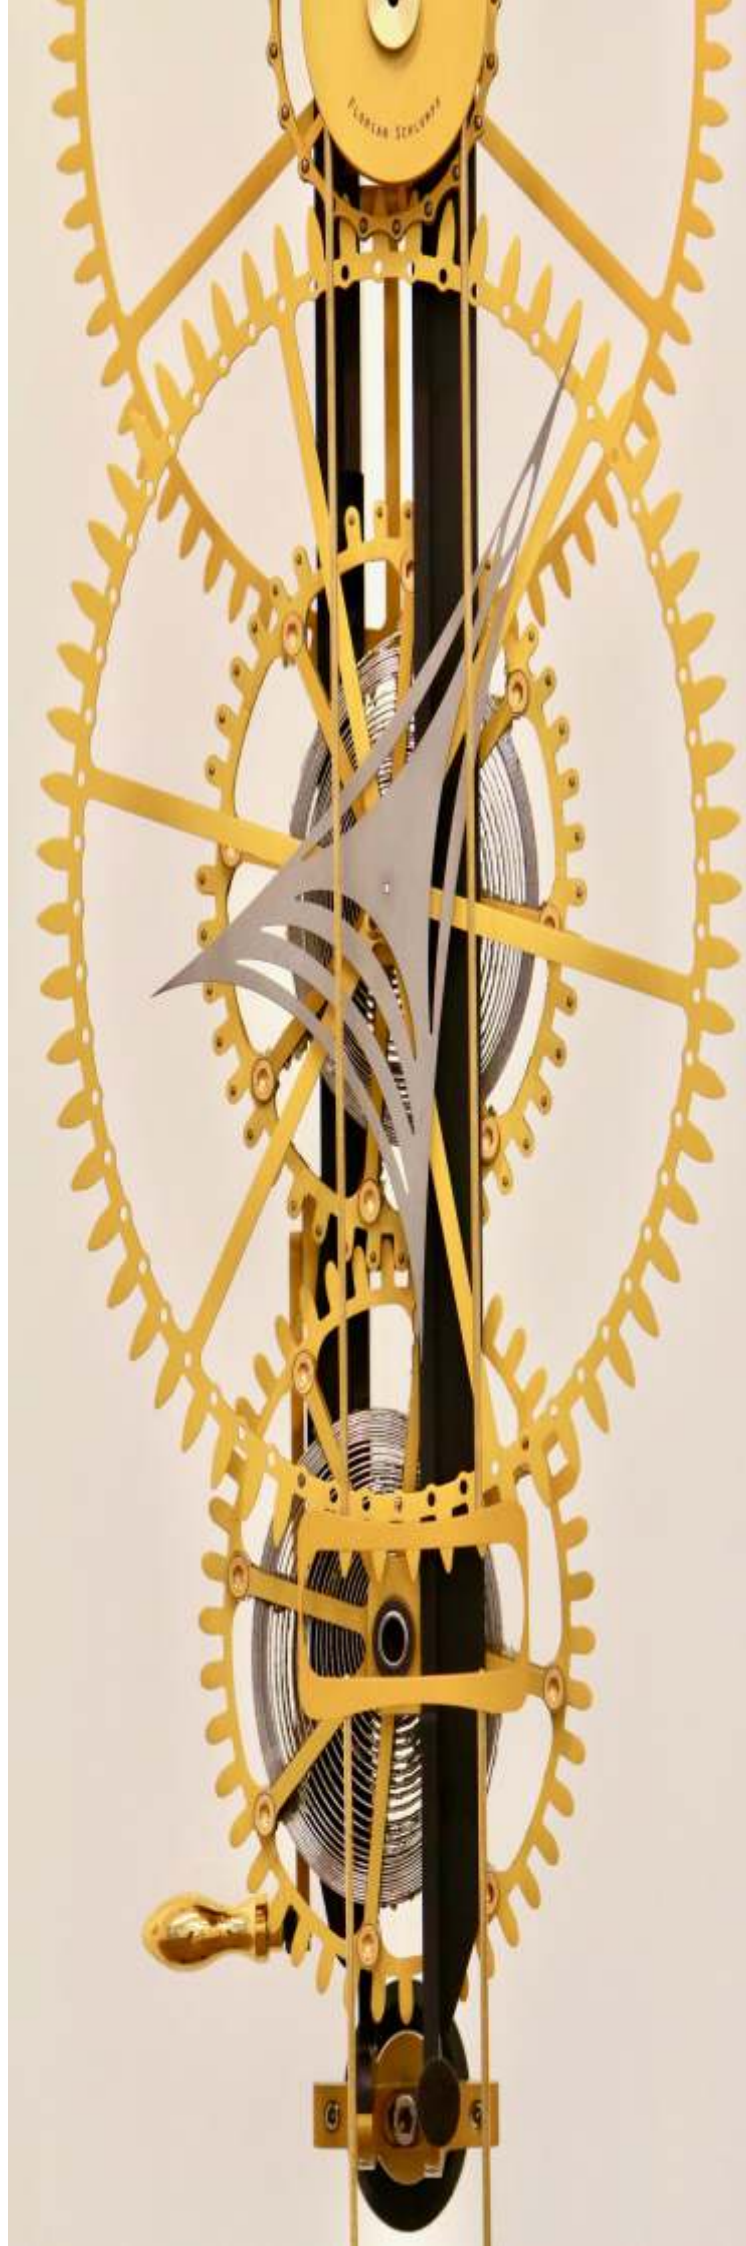

The E.H.E. EurAka's expertise in engineering is internationally renowned and has attracted significant research funding. One of the latest examples is within Germany's national project 'Industry 4.0'. This has also resulted in prestigious collaborations with first-tier institutes of various universities, like the iPAT Institute of the famous University of Erlangen, Germany, and prestigious collaborations with global corporations in which the one with STEAG AG is by far not the only one.

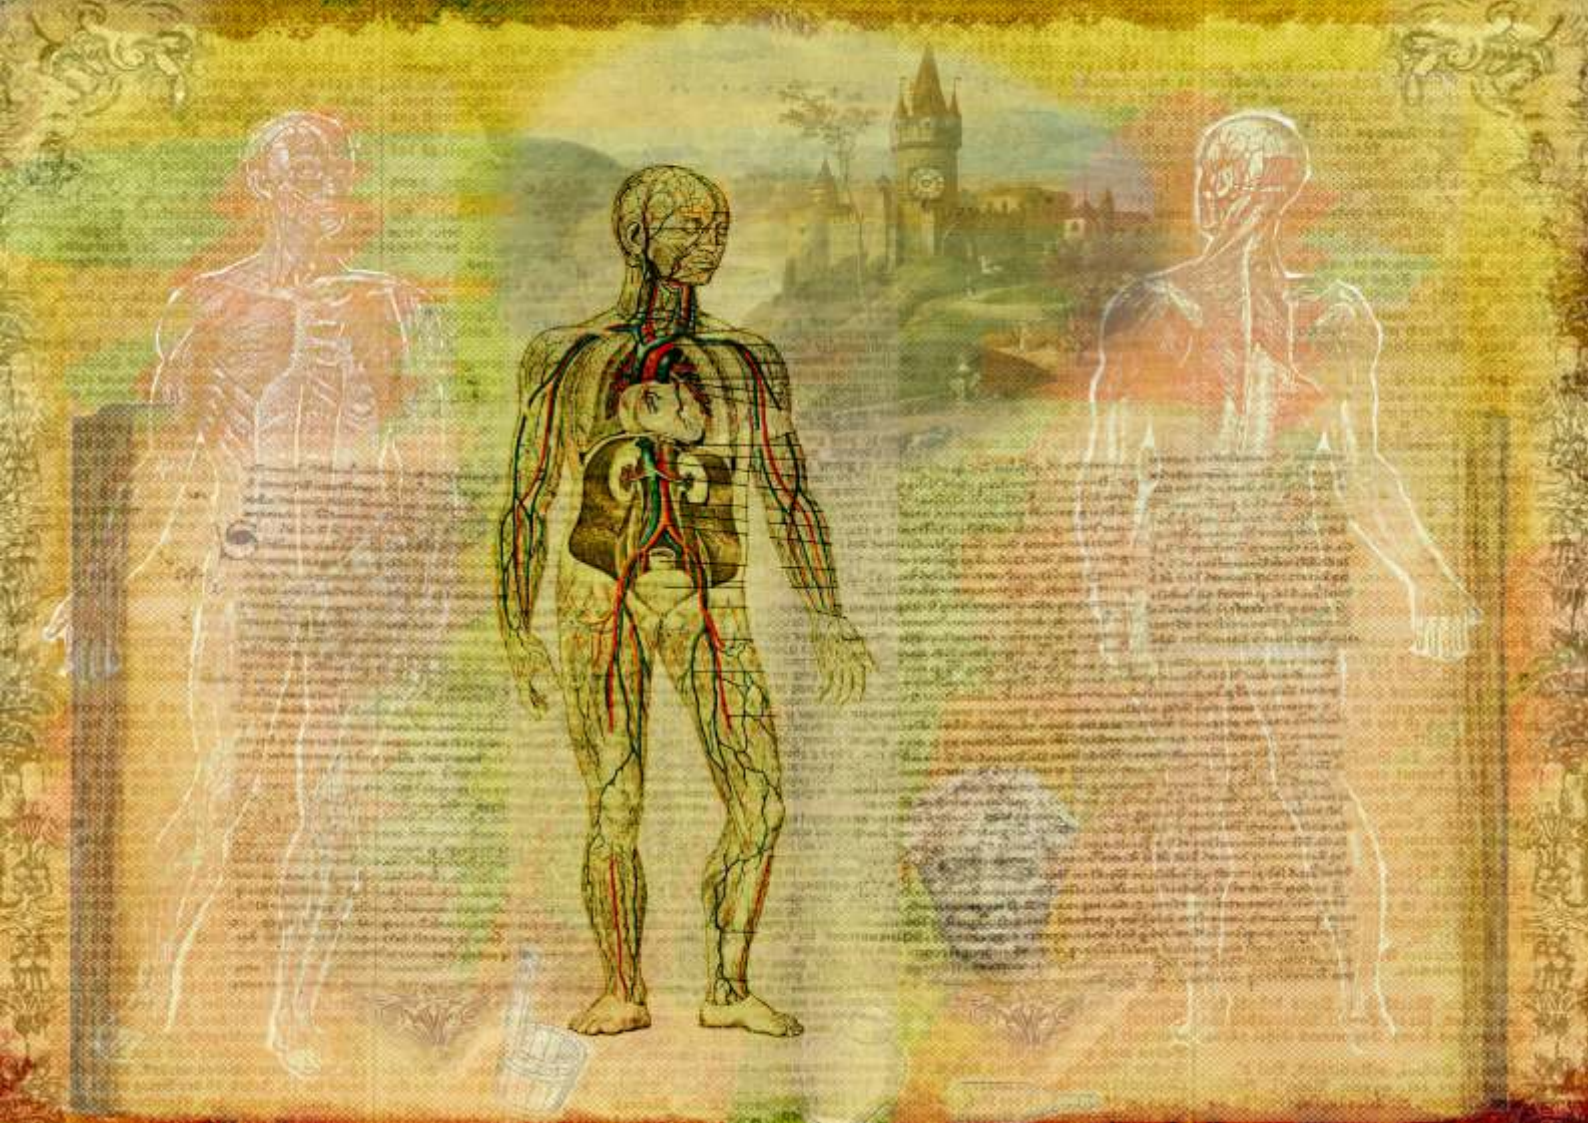

The E.H.E. EurAka does not only offer highest competence in one worldwide famous engineering brand, but in two: Switzerland and Germany.

However, delivering such outstanding expertise globally is confronted with serious limitations. Knowledge transfer of such expertise is extremely difficult. To offer at least some of it, in a responsible form, the E.H.E. EurAka invites to a combined form of studies in which its respective excellence finds a feasible place. Respective examples are the Bachelor and Master in:

- **Total Plant Management**
- **Quality Management**

advantageously combining technology and management. Both pathways of specialisation curricula are essentially influenced by the E.H.E. EurAka's expertise in engineering/technology, management and economics.

The Faculty for Integral Medicine

The third, but not last Faculty of the E.H.E. EurAka is about integral medicine. The Faculty offers an increasing number of programmes on undergraduate and post-graduate level.

There are sophisticated studies in psychology with various pathways of specialisation, which are mainly delivered in close collaboration with the City Unity College as the private University's study centre in Athens. In the wider understanding of integral medicine, these programmes are complemented by further pathways of specialisation, e.g., in sports.

Beyond Master's studies there also is the research degree programme of the Medical

Doctor, which offers medical professionals a research degree belonging to the academic strand of professional doctorates.

Like the Institute for Economy and Law, this faculty also has close ties to the Faculty of Economics.

These connections can be found on two specific academic levels - Master's and research studies:

- **The Master of Healthcare Administration**
- **The Doctor of Healthcare Administration**

It is the meaningful expertise for all those, who are working in the administration of healthcare organisations.

Global Student Benefits

- **Degree from a private Swiss University**
- **International Degree officially approved in Europe**
- **Further official approval beyond Europe**
- **Campuses in Switzerland and Germany**
- **Latest academic knowledge with practice-orientation for Employability Impact**
- **Individual ISO 17024 Certification**
- **Delivery by carefully selected national Partner Institutes making studies more affordable and accessible**
- **Certificate, Transcript, and the official EU Diploma Supplement of the Europass**
- **Part of a truly global student community**
- **Progression up to doctoral studies with the E.H.E. EurAka itself or other universities**
- **International Graduation Ceremonies**
- **Global Alumni Network**

**'Graduation is not the
terminus of your experience;
it is the terminal
of your success.'**

Christian J. Dolores

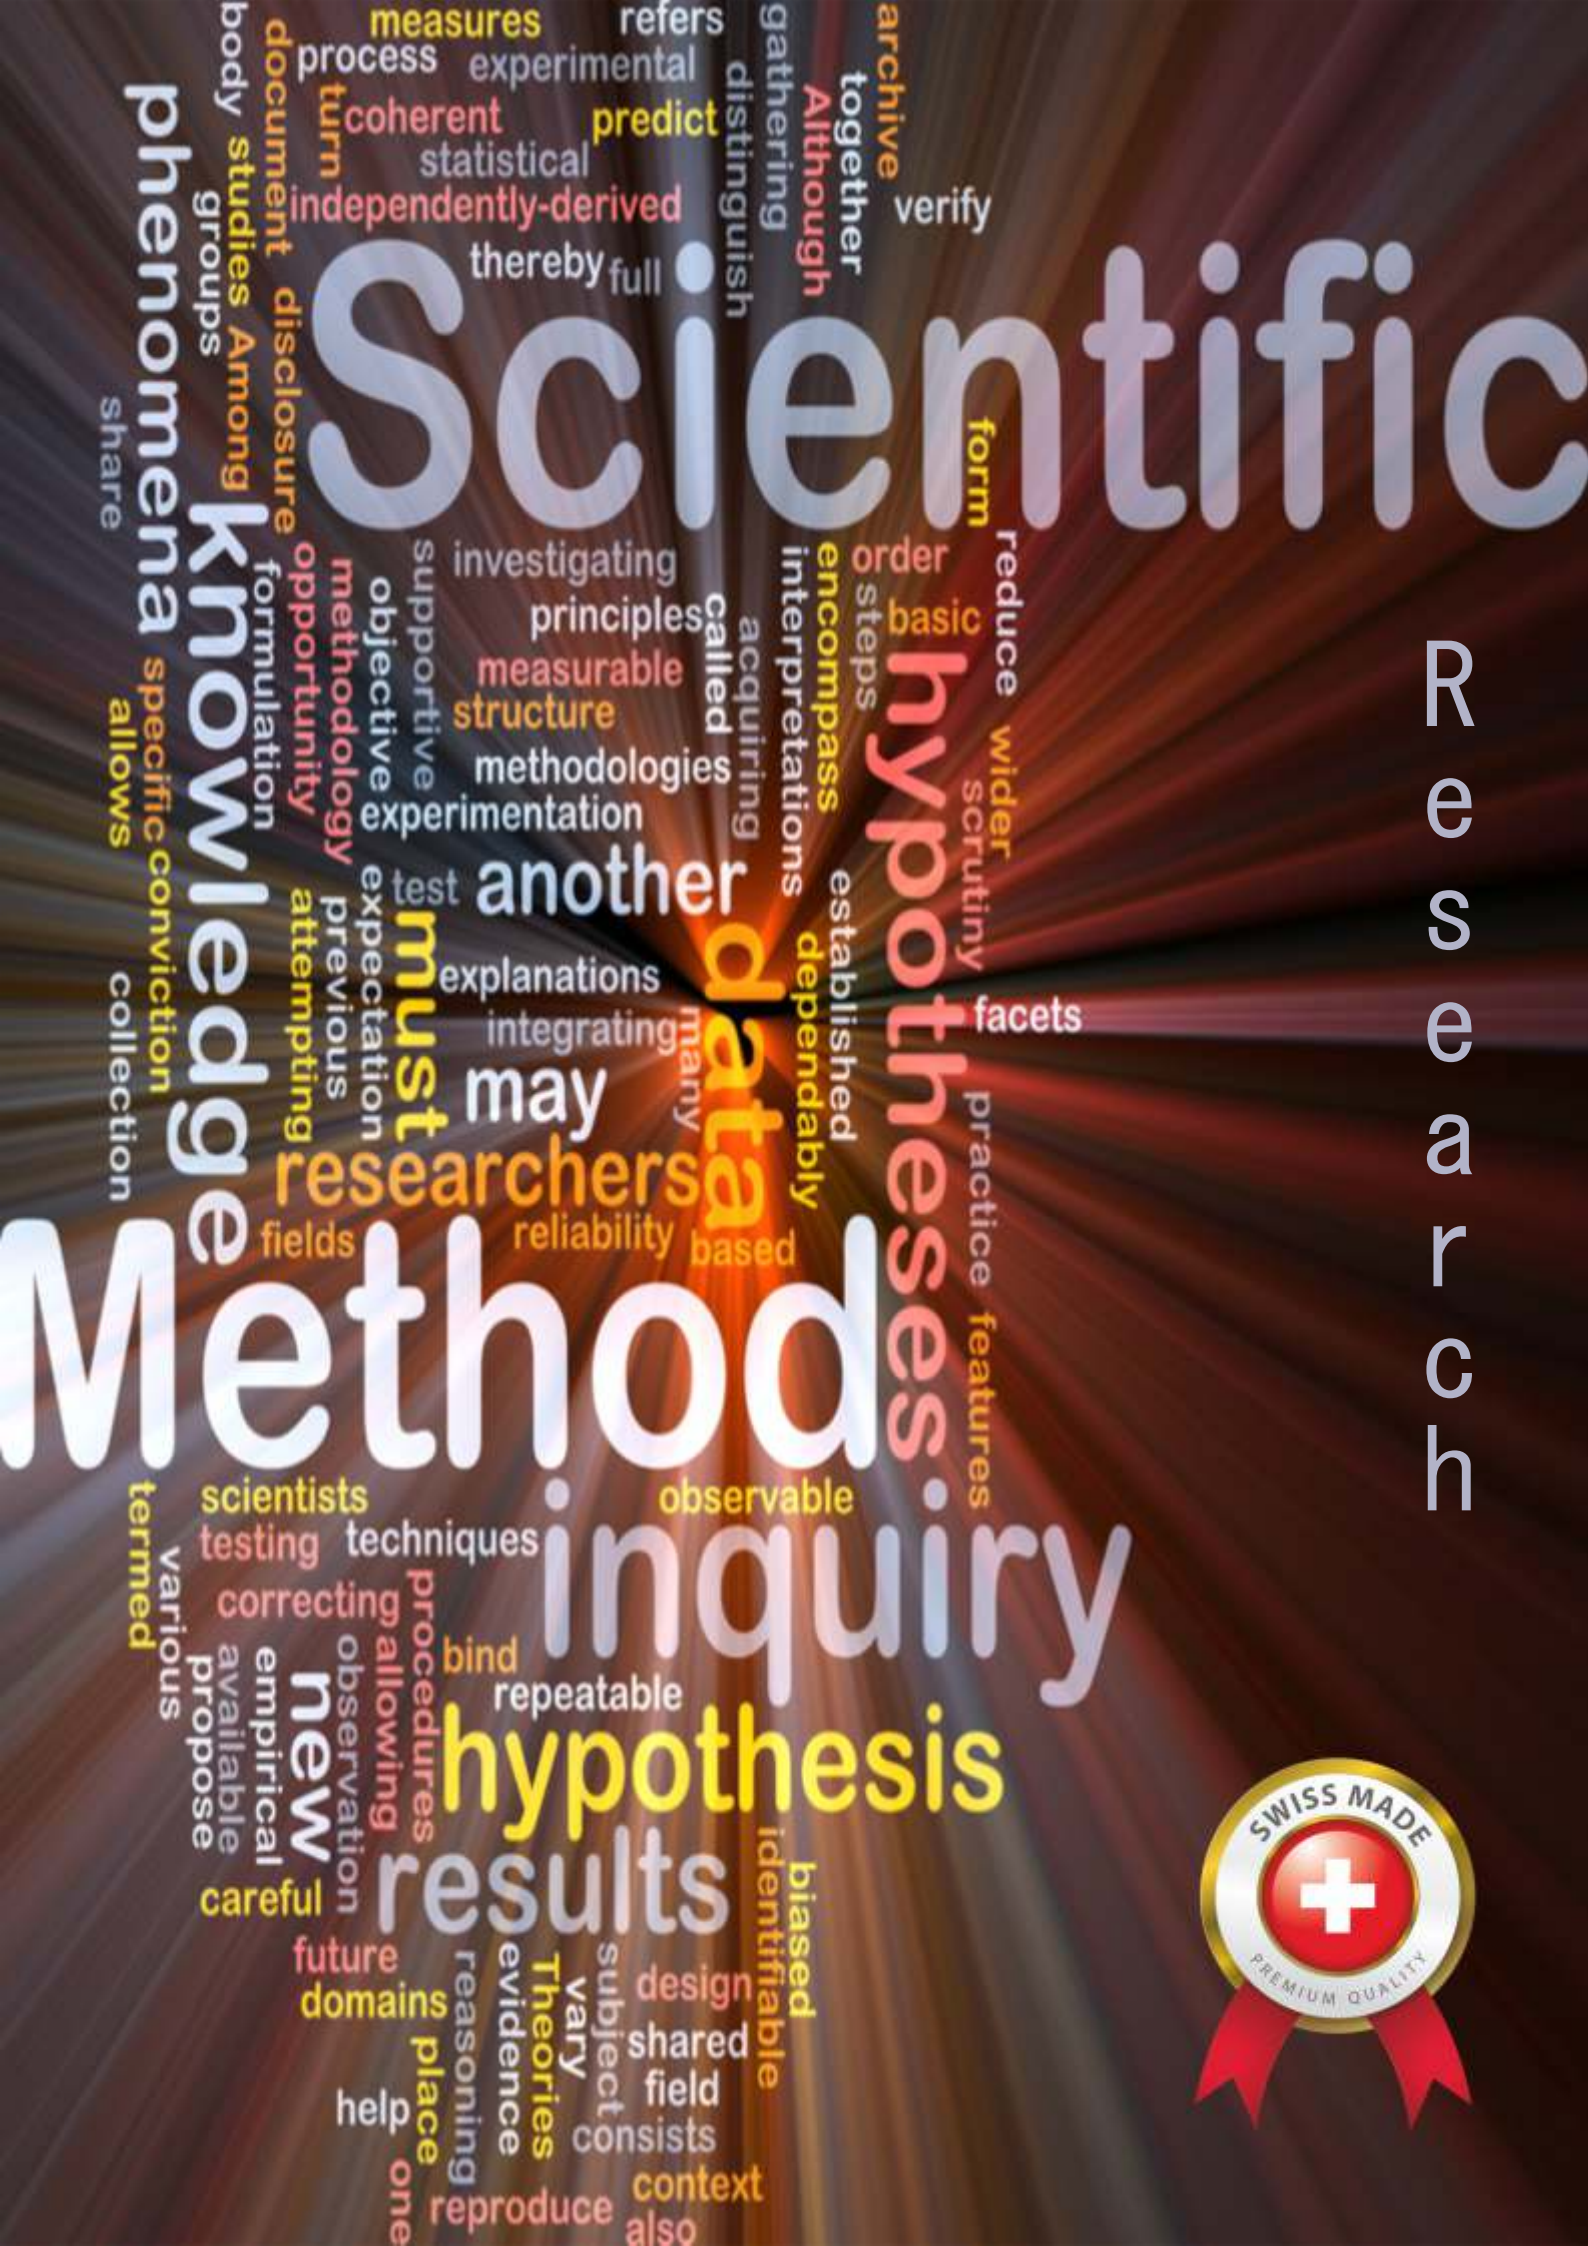

The Festive Conclusion: The E.H.E. EurAka Graduation Ceremony

The Graduation Ceremony of the E.H.E. Europa Hochschule EurAka CH is a festive moment to celebrate an outstanding achievement. As rewarding especially this day is and as rewarding the moment is to receive the deserved academic Degree, it should never be the end, but the start for more. Of course, close relatives and friends are equally welcome to the Ceremony, since very often, they have contributed much for that such challenging degree could be achieved.

The Graduation Ceremony of the E.H.E. EurAka usually takes place in Switzerland. The moment to throw the caps will be in all graduates' mind for years to come. Meeting peers from many countries and different continents demonstrates that a global community of EurAka graduates grows each year.

This moment also is the University's warm invitation to become a valuable member of its Alumni community, for all those not already being part of it. Global networking for mutual benefits and equally the opportunity of coaching others both symbolise the high academic culture the E.H.E. EurAka owns.

E.H.E. EurAka Research in Technology and Engineering

First of all, the E.H.E. EurAka is a research-intensive private University. She owns an outstanding track record in technological research. Her research and development in engineering has resulted in outputs of global impact and attracted substantial research funding from governments and corporations.

A few examples comprise funded research within Germany's 'Industry 4.0' project. One other has led to significant progress in the use of hydrogen as future energy source. The Envirotherm project funded by the State of Saxonia is a next prestige project in which the E.H.E. EurAka delivered essential contributions. E.g., airports in the Middle East and Europe are filled with the University's research output. The list can go on and on.

That means cutting edge technology is core of the research output of the E.H.E. EurAka, often accomplished in collaboration with other renowned Universities. The long-term partnership with the iPAT Institute of the internationally first-tier public German University Nuremberg-Erlangen deserves special attention. But there are cooperating corporations, too.

In November 2019, the influential and the world's biggest association of engineers, Germany's VDI, has honoured the E.H.E. EurAka President, Prof Diener, for his 50 years of membership. The VDI and its expert working groups are a near endless resource on which the University can draw.

It definitely is no exaggeration to claim that the research in technology of the E.H.E. EurAka is a centre of excellence. And, how many universities can claim that they have their own factory? The E.H.E. EurAka can.

The Envirotherm Project funded by the State Ministry for Economy, Labour, and Traffic of the State of Saxony with participation of the E.H.E. EurAka | DBIC

E.H.E. EurAka Research Group

The SusChem Initiative funded by the Federal Minsry for Economy and Energy with participation of the E.H.E. EurAka | DBIC

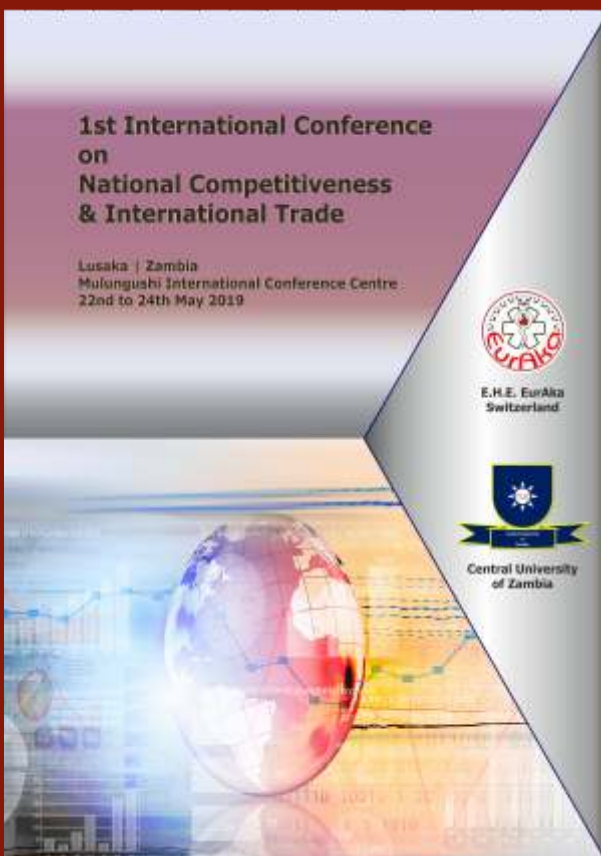

Research in Economics

In business and management the E.H.E. EurAka's research has joined forces with various institutions in different countries. For the reason of knowledge exchange academic conferences are on the agenda, but also the opportunity that industry and academia both find a platform for mutually beneficial discussions.

However, there are stories, too. Some may even say that they are part of a fairytale. Among the E.H.E. EurAka's faculty members' connections some wonderful and long-term relationships have developed within their many fields of research. The likely most glamorous one was with the late Chevalier Professor Tony Dyson, who has excited the world with his icon, the Star Wars' robot R2D2. Few know that Professor Tony Dyson was not only the creator of most famous Hollywood special effects reaching back to James Bond Moon Raker. In his last 10 years or so, Prof Dyson had become a serious and globally renowned researcher in robotics, avatar technology, and the development of the Virtual Avatar 3-D University.

This has connected Chevalier Professor Tony Dyson with the E.H.E. EurAka's research. The particular research was so important that it was presented through the Higher Education Academy (UK) at Cambridge University and found numerous global publications in journals.

Research Impact on Studies

Which advantages do gain students from such activities in research? Uncounted ones.

- Reconnaissance from research is part of lectures.
- Research assures that latest knowledge is taught.
- Research makes sure that professors of the E.H.E. EurAka are state of the art in their own subject area,
- from which students greatly benefit.

This is one part more, how the E.H.E. Europa Hochschule EurAka CH offers highest academic standards for that all its students gain knowledge and skills driving their

profession. That is essential:

- **What is discovered today, will impact on the globalised world tomorrow.**

Tomorrow will be the time, when graduates will have to apply their knowledge. Whether they will then be an academic or professional makes no difference.

Since **'The best way to predict the future is to invent it!'** - Provided graduates have those skills doing so. - Thus, these skills are exactly what studies with the E.H.E. EurAka are made for.

**E.H.E. Europa

'In the future, education could be your wisest investment.'

HSBC Bank plc

The future will be full of challenges and risks. But there are many opportunities, too. **'In the future, education could be your wisest investment.'**

This statement of HSBC Bank plc holds, what the E.H.E. Europa Hochschule EurAka CH and her faculties do belief.

No doubt, education, in particular higher education is an initial cost. But in the long-term it is an investment, which likely has the highest interest rate, which can be achieved. And, it is an investment, which guarantees its dividend, if the right university is selected. To be this right University is the wish, commitment, and endless effort of all staff at the E.H.E. EurAka. Whether academic or administrative, all members of staff work together to achieve this goal.

The E.H.E. EurAka does not only teach responsibility and sustainability, it stands for it. It lives it. For this reason the University has joined the PRiME Framework of the United Nations as Member and Signatory. Therefore the future of the University will be ongoing improvement and always better quality. Which technology will shape the future, which market and societal changes will happen, the University wants to anticipate these and prepare all her stakeholders for taking advantage of and profit from these.
